WHO WE ARE

Born in the Himalayas. Built for global brands.

Giva Agro was founded in Dehradun, at the foot of the Indian Himalayas, by a team of agricultural specialists, herbalists and wellness formulators with one objective: bring the purity of Himalayan botanicals to the world without exhausting the land they come from.

What began as an essential oils and Himalayan Shilajit business has become a full herbal nutraceutical contract manufacturing operation. We produce capsules, tablets, softgels, powders and liquid formats for private label and white label partners across four continents — applying to their brands exactly the standards we apply to our own.

We are a manufacturer, not a trading desk. We formulate, we produce, we test, and we ship. Our partner offices in France, New Zealand and Australia mean your commercial contact works in your timezone and understands your market's rules before you ask.

For international brands, that combination matters: Himalayan raw material at source, standardised and documented actives, and a regulatory conversation that starts at the formulation stage rather than at customs.

Dehradun, India

Manufacturing, R&D and quality control at the Himalayan source

3 partner offices

France, New Zealand and Australia — commercial support in your timezone

500+ formulations

A development library across every major wellness category, plus custom development on request

WHAT WE STAND FOR

Sustainability

Ethical sourcing, zero-waste processing, clean energy and recyclable, biodegradable packaging across every line we run.

Quality

Botanicals specified by marker compound and tested batch by batch — identity, potency, heavy metals and microbiology.

Partnership

Cruelty-free, clean-label formulations and a team that treats your launch timeline as its own commitment.

THE COMMERCIAL CASE

Six reasons brands in Europe and Australasia manufacture with us.

01

Market-ready, not just factory-ready

We build toward the market you are actually selling into — EU food supplement labelling under Regulation (EU) 1169/2011, TGA-listable compositions for Australia, and New Zealand Dietary Supplements Regulations limits — before the first batch is scheduled.

02

Formulations you can legally claim

Every formula is mapped to the health claims it can genuinely carry under Regulation (EC) No 1924/2006. You get the authorised claim wording your label can survive on, instead of marketing copy a regulator will strike out.

03

Himalayan raw material at source

Our Shilajit and Himalayan botanicals come from our own region and our own supply relationships — not through three layers of intermediaries. That is what makes traceability documentation possible rather than aspirational.

04

Standardised actives, documented

Withanolides, saponins, curcuminoids, fulvic acid, gingerols, boswellic acids, ketosterones: our botanical extracts are specified by marker compound and every batch is assayed against that specification.

05

Low MOQs for market entry

Private label typically starts at 1,000 units per SKU. Validate the product with real customers, then scale — without carrying a container of inventory through your first year.

06

Clean-label by default

100% vegetarian HPMC capsules, non-GMO inputs, no artificial colours or preservatives, allergen-controlled lines. The specification European and Australasian retail buyers now treat as the baseline.

WHAT YOU RECEIVE WITH EVERY PROGRAMME

- Certificate of Analysis per batch
- Full product specification sheet
- Stability data on request
- Allergen & GMO declarations
- Vegan / vegetarian statement
- BSE / TSE statement
- Certificate of Origin
- Free Sale Certificate
- Export & freight documentation

MANUFACTURING CAPABILITIES

Six dosage forms. One accountable partner.

Our facility is built for precision and flexibility — from a 1,000-unit market test to repeat container volumes — with dosage accuracy, batch consistency and export-grade documentation as standing requirements rather than premium extras.

DOSAGE FORMS WE MANUFACTURE

01 · CAPSULES

Vegetarian & HPMC capsules

Size 0 and 00, 250 mg to 1,000 mg fill. Herbal extract blends, multivitamin and multimineral, probiotic and adaptogen formulations.

02 · TABLETS

Coated & uncoated tablets

Herbal, mineral and combination formulations. Custom size, shape, embossing and coating colour; bilayer available on request.

03 · SOFTGELS

Oil & suspension softgels

Omega-3, evening primrose, flaxseed and garlic oils; herbal actives in oil base. Custom shapes and colours, high-bioavailability formats.

04 · POWDERS

Single herb & polyherbal powders

Retail packs from 30 g to 100 g and bulk formats. Detox, digestion, immunity and women's health blends.

05 · LIQUIDS

Drops, tinctures & resins

Alcohol-free vegetable glycerin tinctures, herbal drops and Shilajit resin. Dropper bottles and glass jars from 15 g upward.

06 · SACHETS

Single-dose & effervescent

Single-serve sachets for powders, granules and drink mixes — ideal for sampling, travel packs and subscription boxes.

PROCESS CAPABILITY

- **Extraction & standardisation** to declared marker compound
- **Granulation, blending and encapsulation** under controlled humidity
- **Tablet compression and coating** with in-process weight control
- **Primary and secondary packaging** including tamper-evident sealing
- **Batch coding, serialisation** and export documentation

PACKAGING OPTIONS

- **Bottles** — HDPE, PET and glass, 120cc to 250cc, for 30/60/90/120/180 counts. White, amber, green or black with gold or silver caps.
- **Zip-lock pouches** — 30 to 120 capsules, printed or labelled, low MOQ
- **Sachets** — single-use and daily-dose, fully customisable printing
- **Display cartons** — branded outers for retail shelf and e-commerce transit

PRODUCT PORTFOLIO

A 500+ formulation library, organised by the benefit they deliver.

Consumers do not shop by dosage form — they shop by outcome, so our portfolio is built the same way. The fifteen formulations below are a representative selection across seven benefit categories. Our full library runs to more than 500 — and if what you need is not in it, we will develop it.

FORMULATION	BENEFIT CATEGORY	DOSAGE FORM	SERVING
7-in-1 Immunity Boost	Immunity & daily defence	Vegetarian capsule	2 capsules · 60 servings
11-Mushroom Complex	Immunity & daily defence	Vegetarian capsule	3 capsules
Stamina & Vitality Booster	Men's vitality & performance	Capsule · 500 mg	2 capsules · 60 count
Advanced Testosterone Booster	Men's vitality & performance	Capsule · 500 mg	2 capsules · 60 count
Tongkat Ali 400 mg	Men's vitality & performance	Vegetarian capsule	2 capsules daily
Men's Multivitamin + Probiotics	Men's vitality & performance	Capsule · 500 mg	2 capsules · 60 count
Ultimate Women's Hormonal Balance	Women's health & hormonal balance	Capsule · 500 mg	2 capsules · 60 count
Women's Reproductive Wellness	Women's health & hormonal balance	Capsule · 500 mg	2 capsules · 60 count
Magnesium & B6 Complex	Women's health & hormonal balance	Vegetarian capsule	1 capsule · 60 servings
Lactation Support Drops	Women's health & hormonal balance	Liquid tincture	1 mL · 30 drops
Bone Strength Complex	Bone & structural strength	Vegetarian capsule	4 capsules
Colostrum Gut Health Complex	Gut health & digestion	Vegetarian capsule	3 capsules
Brain Drive Nootropic	Cognitive performance & focus	Vegetarian capsule	2 capsules
Shilajit Extract Capsules	Energy & Himalayan actives	Capsule · 500/800 mg	60/90/120 count
Vitality Plus Vitamins	Energy & Himalayan actives	Capsule · 500 mg	2 capsules · 60 count

EVERY FORMULATION IS AVAILABLE AS

Private label — your brand, our formulation, our documentation · **White label** — fastest route to shelf on a proven SKU · **Custom formulation** — any product, built to your brief from scratch · **Bulk supply** — capsules, powders and extracts for your own filling line

Immunity & Daily Defence

Vitamin, botanical and functional-mushroom formulations built around the immune claims a European label can legally carry — not around marketing language that will not survive review.

2 SHOWN
OF 500+

7-in-1 Immunity Boost Capsules

VEGETARIAN CAPSULE
2 CAPSULES · 60 SERVINGS

A high-strength daily immunity formula pairing buffered vitamin C and vitamin D3 — the two nutrients carrying authorised EU immune claims — with elderberry and ginger, the two most recognised botanicals in the seasonal wellness category.

PER 2-CAPSULE SERVING

- Vitamin C** (as C300®) — 1,000 mg

Vitamin D3 (cholecalciferol) — 125 mcg / 5,000 IU

Elderberry extract (5% flavonoids) — 250 mg
- Ginger root** powder + extract (10% gingerols) — 200 mg

Capsule — hydroxypropyl methylcellulose (HPMC), vegetarian

EU CLAIM ANCHORS

“Vitamin C contributes to the normal function of the immune system.” · “Vitamin D contributes to the normal function of the immune system.” Vitamin D3 is supplied at 5,000 IU as standard; we down-dose to the permitted maximum for each destination market on EU, Australian and New Zealand builds.

11-Mushroom Complex Capsules

VEGETARIAN CAPSULE
3 CAPSULES PER SERVING

A full-spectrum functional mushroom stack with Lion's Mane, Turkey Tail, Cordyceps and Reishi at 400 mg each — real weights, not a dusting — for the fastest-growing botanical segment in European and Australasian wellness retail.

PER 3-CAPSULE SERVING

- Lion's Mane** (*Herichium erinaceus*) — 400 mg

Turkey Tail (*Coriolus versicolor*) — 400 mg

Cordyceps (*Cordyceps sinensis*) — 400 mg

Reishi (*Ganoderma lucidum*) — 400 mg

Chaga 3:1 (*Inonotus obliquus*) — 300 mg

Maitake (*Grifola frondosa*) — 200 mg
- Shiitake** (*Lentinula edodes*) — 200 mg

Royal Sun (*Agaricus blazei*) — 100 mg

White Button (*Agaricus bisporus*) — 100 mg

Wood Ear (*Auricularia polytricha*) — 100 mg

Other — HPMC capsule, acetylated polysaccharide

FORMULATION NOTES

Manufactured gluten-free and non-GMO. Species identification, part-used and extraction-method documentation supplied for every strain. Ratios and strain selection are fully customisable.

BUILDING AN IMMUNITY SKU FOR EUROPE OR AUSTRALASIA?

Immunity is the one category where the claim rules are unusually clear — and unusually restrictive. Vitamin C, vitamin D, zinc, selenium, copper, folate, iron and vitamin B6, B12 and A all carry authorised EU immune-function claims. Botanicals — elderberry, echinacea, ginger and mushroom extracts — currently carry none. We build immunity formulas so the **nutrients carry the claim** and the **botanicals carry the story**. That is a label that sells and survives review.

Men's Vitality, Strength & Performance

The highest-velocity category in international supplement retail — and the one where formulation depth is what separates a brand from a commodity.

4 SHOWN
OF 500+

Stamina & Vitality Booster

CAPSULE · 500 MG · 60 COUNT
2 CAPSULES PER SERVING

Fourteen standardised Ayurvedic and nutraceutical actives in one capsule — our flagship men's performance formula.

PER 2-CAPSULE SERVING

Shilajit (40% fulvic acid) — 200 mg
Ashwagandha (5% withanolides) — 150 mg
Safed Musli (50% saponins) — 100 mg
Kaunch Beej (15% L-Dopa) — 100 mg
Tribulus terrestris (40% saponins) — 100 mg
Panax ginseng (5% ginsenosides) — 75 mg

Gokshura (40% saponins) — 75 mg
Vidarikand — 50 mg · **Maca root** — 50 mg
Beetroot 10:1 — 50 mg · **Cordyceps** — 25 mg
Black pepper (95% piperine) — 15 mg
Ginger (5% gingerols) — 10 mg · vegetable capsule

Advanced Testosterone Booster

CAPSULE · 500 MG · 60 COUNT
2 CAPSULES PER SERVING

D-aspartic acid and standardised botanicals with zinc, vitamin D3 and boron — for sports nutrition and men's health.

PER 2-CAPSULE SERVING

D-aspartic acid — 350 mg
Fenugreek seed (50% saponins) — 200 mg
Tribulus terrestris (40% saponins) — 200 mg
Zinc (as zinc sulphate)

Vitamin D3 (cholecalciferol)
Boron (as boron citrate)
Black pepper (95% piperine) · vegetable capsule

EU CLAIM ANCHORS

“Zinc contributes to the maintenance of normal testosterone levels in the blood.” · “Vitamin D contributes to the maintenance of normal muscle function.” Rare among men's formulas in carrying a compliant testosterone claim in Europe. Mineral and vitamin doses are set to destination-market limits.

Tongkat Ali 400 mg Capsules

VEGETARIAN CAPSULE
2 CAPSULES DAILY

Single-actives Eurycoma longifolia root extract at 400 mg — the clean-label SKU for sports nutrition and men's health e-commerce.

COMPOSITION

Eurycoma longifolia (Tongkat Ali) root extract — 400 mg per capsule. Other ingredients: rice flour, hypromellose (vegetarian capsule), magnesium stearate, silica. Non-GMO · vegan · gluten-free · no artificial colours or preservatives.

Men's Multivitamin + Probiotics Formula

CAPSULE · 500 MG · 60 COUNT
2 CAPSULES PER SERVING

A complete daily men's foundation — thirteen vitamins and minerals, CoQ10, two adaptogens and two probiotic strains.

PER 2-CAPSULE SERVING

Vitamin A — 900 mcg · **Vitamin C** — 80 mg
Vitamin D3 — 50 mcg · **Vitamin E** — 15 mg
Vitamin B complex — 100 mg
Zinc — 15 mg · **Magnesium** — 50 mg
Iron — 10 mg · **Coenzyme Q10** — 100 mg

Ashwagandha (5% withanolides) — 150 mg
Panax ginseng (5% ginsenosides) — 100 mg
L. acidophilus 50 mg · **B. bifidum** 50 mg
Black pepper (95% piperine) — 10 mg

Women's Health, Hormonal Balance & Fertility

Ayurvedic botanical tradition combined with the mineral and vitamin actives that carry authorised hormonal and fatigue claims in Europe.

4 SHOWN
OF 500+

Ultimate Women's Hormonal Balance & Vitality

CAPSULE · 500 MG · 60 COUNT
2 CAPSULES PER SERVING

Classical Ayurvedic women's herbs paired with a meaningful magnesium dose and bioavailability-enhanced curcumin.

PER 2-CAPSULE SERVING

Magnesium citrate — 310 mg

Hadjod / *Cissus quadrangularis* (10% ketosterones) — 310 mg

Ashoka extract 10:1 — 155 mg

Shallaki / *Boswellia serrata* (65% boswellic acids) — 100 mg

Curcumin (95% curcuminoids) — 100 mg

Black pepper (95% piperine) — 25 mg

Lodhra extract · vegetable capsule shell

EU CLAIM ANCHORS

"Magnesium contributes to a reduction of tiredness and fatigue", "...to normal muscle function" and "...to normal psychological function."

Women's Reproductive Wellness & Fertility Booster

CAPSULE · 500 MG · 60 COUNT
2 CAPSULES PER SERVING

Twelve standardised Ayurvedic botanicals for the reproductive and menstrual wellness segment.

PER 2-CAPSULE SERVING

Ashoka 10:1 — 187.5 mg

Shatavari (40% saponins) — 187.5 mg

Gokshura (40% saponins) — 125 mg

Lodhra 10:1 — 100 mg

Manjistha (5% alkaloids) — 75 mg

Giloy (5% bitters) — 75 mg

Turmeric (95% curcuminoids) — 60 mg

Anantmool 10:1 — 50 mg · **Punarnava** 10:1 — 50 mg

Moringa 10:1 — 50 mg · **Pippali** (5% piperine) — 25 mg

Black pepper (10% piperine) — 15 mg · vegetable capsule

Magnesium & B6 Complex

VEGETARIAN CAPSULE
1 CAPSULE · 60 SERVINGS

A one-a-day PMS and mood-support SKU built on the most bioavailable magnesium form.

PER CAPSULE

Magnesium (bisglycinate chelate, buffered) — 200 mg

Vitamin B6 (pyridoxine HCl) — 12.5 mg

Chasteberry fruit extract — 50 mg

Dong Quai root extract — 2.5 mg

EU CLAIM ANCHORS

"Vitamin B6 contributes to the regulation of hormonal activity" and "...to normal psychological function." · "Magnesium contributes to a reduction of tiredness and fatigue." A women's SKU with genuinely compliant hormonal claim wording.

Lactation Support Drops

LIQUID TINCTURE
1 ML / 30 DROPS

An alcohol-free glycerin tincture for the nursing-mother segment — a rare liquid format in a capsule-dominated category.

PER 1 ML SERVING

Proprietary herbal blend — 1 mL: blessed thistle seed, moringa leaf, fenugreek seed, anise seed, goat's rue herb. **Other ingredients:** vegetable glycerin, purified water (pH neutral). Alcohol-free · no added sugars · 100% natural · non-GMO · vegan · gluten-free.

Bone & Structural Strength

Mineral-led formulations where the authorised EU claim set is unusually generous — and where formulation quality is visible on the label.

1 SHOWN
OF 500+

Bone Strength Complex

VEGETARIAN CAPSULE
4 CAPSULES PER SERVING

Microcrystalline calcium hydroxyapatite — the calcium form found in bone itself — with the D3 and K2 pairing and the trace minerals this category is now judged on. A formulation for all life stages, and a strong fit for the ageing-population segment across Europe and Australasia.

PER 4-CAPSULE SERVING

Calcium hydroxyapatite — 930 mg

Calcium (carbonate + hydroxyapatite) — 250 mg

Magnesium (as gluconate) — 210 mg

Vitamin C (ascorbic acid) — 115 mg

Vitamin D3 (cholecalciferol) — 25 mcg / 1,000 IU

Vitamin K2 (menaquinone-4) — 40 mcg

Zinc — 2 mg · **Manganese** (amino acid chelate) — 1 mg

Other — hypromellose capsule

EU CLAIM ANCHORS — FOUR AUTHORISED BONE CLAIMS IN ONE FORMULA

“Calcium is needed for the maintenance of normal bones and teeth.” · “Vitamin D contributes to the normal absorption and utilisation of calcium.” · “Vitamin K contributes to the maintenance of normal bones.” · “Manganese contributes to the maintenance of normal bones.”

Gut Health, Digestion & Microbiome

The highest-growth wellness category in Europe, and the one where ingredient architecture matters most to an informed buyer.

1 SHOWN
OF 500+

Colostrum Gut Health Complex

VEGETARIAN CAPSULE
3 CAPSULES PER SERVING

A four-part gut architecture in one capsule — colostrum, a supporting amino acid, a prebiotic botanical fibre blend, and a probiotic-plus-enzyme complex.

PER 3-CAPSULE SERVING

Colostrum — 1,000 mg

L-Lysine HCl — 500 mg

Niacinamide (vitamin B3) — 30 mg

Folate (as (6S)-5-MTHF) — 500 mcg DFE

Clean GoodGut digestive blend — 215 mg: apple pectin,

sprouted fermented ginger, fennel seed, artichoke leaf 10:1,

Echinacea purpurea, Oregon grape root, turmeric, licorice root, black pepper 10:1

Probiotic & digestive enzyme blend — 105 mg

FORMULATION NOTES

Available as specified, or as a fully vegan reformulation with plant-derived alternatives to colostrum. Probiotic strain selection, CFU count and enzyme profile are all customisable to your brief.

Cognitive Performance & Focus

Nootropics have moved from niche to mainstream in European retail — and informed consumers now read the label for active vitamin forms.

1 SHOWN
OF 500+

Brain Drive Nootropic Capsules

VEGETARIAN CAPSULE
2 CAPSULES PER SERVING

Built on methylated, active-form B vitamins and three clinically familiar brain nutrients. The active forms are a genuine premium differentiator — and one your label is allowed to talk about.

PER 2-CAPSULE SERVING

Acetyl-L-carnitine HCl — 500 mg
L-Tyrosine — 400 mg
Citicoline sodium — 200 mg
Niacin (as niacinamide) — 20 mg

Vitamin B6 (pyridoxal-5-phosphate) — 7.5 mg
Folate (calcium L-5-MTHF) — 167 mcg
Vitamin B12 (methylcobalamin) — 15 mcg

EU CLAIM ANCHORS

“Niacin, vitamin B6, folate and vitamin B12 contribute to normal psychological function” and “...to the reduction of tiredness and fatigue.”
Four nutrients, two authorised claim families, one compliant nootropic label.

Energy, Endurance & Himalayan Actives

Where our origin story becomes a supply-chain advantage: Shilajit sourced, purified and standardised at the Himalayan source.

2 SHOWN
OF 500+

Shilajit Extract Capsules & Resin

CAPSULE · 500 MG OR 800 MG
60 / 90 / 120 COUNT

Our origin product and our strongest differentiator: purified in-house from our own Himalayan region and standardised to fulvic acid — not bought as a finished powder from a trader.

SPECIFICATION & FORMATS

Active — purified Himalayan Shilajit extract, standardised for fulvic acid and trace minerals. **Capsule** — size 0 or 00, 100% vegetarian plant-based shell, 500 mg or 800 mg fill. **Bottles** — 60 / 90 / 120 count in white, amber or black PET or HDPE. **Also available as** resin in 15 g, 30 g, 50 g and 100 g glass jars, and as single-dose sachets. Full fulvic acid assay and heavy-metal data are supplied with every batch.

Vitality Plus Vitamins

CAPSULE · 500 MG · 60 COUNT
2 CAPSULES PER SERVING

A unisex daily foundation blending seven standardised Ayurvedic herbs with a full vitamin and mineral base — the broadest-appeal SKU in our range.

PER 2-CAPSULE SERVING

Shatavari (40% saponins) — 200 mg
Ashwagandha (5% withanolides) — 200 mg
Fenugreek (20% saponins) — 120 mg
Ginger (5% gingerols) — 100 mg
Safed Musli (40% saponins) — 80 mg

Guduchi / Giloy (5% bitters) — 80 mg
Manjistha 4:1 — 53 mg · Iron — 14 mg
Calcium 100 mg · Magnesium 40 mg · Zinc 10 mg
Vitamin D3 400 IU · Vitamin B6 2 mg
Folic acid 200 mcg · Biotin 500 mcg · Chromium 100 mcg

QUALITY ASSURANCE

Quality is a document trail, not an adjective.

Every batch we release carries the evidence behind it — the difference between a buyer's QA team signing your product off in weeks rather than months.

CERTIFICATIONS

GMP	HACCP	ISO	FDA	FSSAI	AYUSH	SPICE BOARD	TEA BOARD
-----	-------	-----	-----	-------	-------	-------------	-----------

Certification scope differs by product line and facility. We confirm the applicable certificate, its scope and its validity for your specific SKU at quotation — and we will tell you plainly where a certificate does not cover what you are asking for.

BATCH TESTING PANEL

TEST	METHOD	WHAT IT CONFIRMS
Identity & marker assay	HPLC / UV-Vis	The declared standardisation is real — withanolides, saponins, curcuminoids, fulvic acid, boswellic acids
Heavy metals	ICP-MS	Lead, cadmium, arsenic and mercury against EU Regulation (EU) 2023/915 and destination limits
Microbiology	Plate & enrichment	Total plate count, yeast & mould, <i>E. coli</i> , <i>Salmonella</i> , <i>S. aureus</i>
Pesticide residue	GC-MS / LC-MS	Multi-residue screen across all botanical inputs
Aflatoxins & mycotoxins	HPLC-FLD	B1, B2, G1, G2 and total aflatoxin content
Residual solvents	GC headspace	Clearance on solvent-extracted botanical fractions
Disintegration & dissolution	Pharmacopoeial	Capsule and tablet release performance in-specification
Moisture & water activity	Karl Fischer / a_w	Shelf-life stability and microbial control
Stability	Accelerated + real time	40°C / 75% RH accelerated, with real-time data to declared shelf life

Documentation supplied with every batch

- Certificate of Analysis
- Product specification sheet
- Batch manufacturing record
- Allergen & GMO declarations
- Vegan / vegetarian statement
- BSE / TSE statement
- Nutritional analysis
- Certificate of Origin
- Free Sale & health certificates

REGULATORY & MARKET ACCESS

We build for your market's rules — before the first batch.

Most supplement export failures are not quality failures. They are composition and claim failures discovered at the border, or by a regulator, months after the money was spent. We front-load that work.

Europe

Food supplements under Directive 2002/46/EC, placed on the market by national notification in each Member State.

WHAT WE PREPARE

- Full ingredient & specification dossier
- Novel Food screening under Reg. (EU) 2015/2283
- Claims mapped to Reg. (EC) 1924/2006
- Labelling to Reg. (EU) 1169/2011 — allergens, nutrition declaration, QUID
- Contaminant limits to Reg. (EU) 2023/915

WATCH ITEMS

Vitamin and mineral maximum levels are still set nationally and differ between Member States. Botanical health claims remain on hold pending EU assessment — so we build labels that do not depend on them.

Australia

Complementary medicines regulated by the TGA. Most supplements enter as Listed medicines (AUST L) on the ARTG, held by an Australian sponsor.

WHAT WE PREPARE

- Composition restricted to TGA permitted ingredients at permitted concentrations
- Claims restricted to the permitted indications list
- Manufacturing evidence supporting GMP clearance for our overseas site
- Full CoA, specification and stability package for your sponsor's certification

WATCH ITEMS

Every ingredient must appear on the permitted ingredients determination. We screen the composition before we quote — not after you have committed to a launch date.

New Zealand

Dietary Supplements Regulations 1985 under the Food Act 2014, administered alongside Medsafe and MPI.

WHAT WE PREPARE

- Composition within maximum permitted daily doses
- Labelling to Regulation 11 — no therapeutic claims, stated or implied
- Documentation supporting your MPI food importer registration
- Biosecurity Act paperwork where animal-origin ingredients are used

WATCH ITEMS

New Zealand has no pre-market approval — the obligation sits entirely with the importer. Documentation quality is the whole defence. The regime is being modernised and we track the changes.

BEYOND THIS BROCHURE

This brochure shows fifteen formulations. Our development library runs to **more than 500**, across every major wellness category — and if the product you need is not in it, our R&D team will build it. Send a specification, a benchmark product, or simply the benefit you want to deliver, and we will develop a formulation for your market, screened against its ingredient and claim rules from the first draft.

Final regulatory responsibility rests with the brand owner or sponsor in each market; we supply the technical evidence, documentation and formulation adjustments that make it defensible.

PRIVATE LABEL & WHITE LABEL PROCESS

From brief to **bonded pallet** in seven steps.

1 Brief & scoping

You give us the market, the category and the target landed cost. We come back with what is achievable — including, where it matters, what is not.

2 Formulation & regulatory screening

We build or adapt the formula and screen it against your destination market's ingredient limits and claim rules before a sample is ever made.

3 Sampling

Physical samples in 7–10 working days, with a draft specification and the claim wording your label can legally carry.

4 Approval

You sign off formula, specification, artwork and claims. Nothing enters production without that signature.

5 Production

Manufacture under GMP with in-process controls at blending, filling, compression and packing.

6 Quality release & documentation

Full QC panel, batch Certificate of Analysis and the complete export documentation pack.

7 Packing & dispatch

Retail-ready packing, export cartons, freight coordination and shipping documents to your port.

COMMERCIAL TERMS

MOQ — private label	From 1,000 units per SKU
MOQ — bulk supply	From 25 kg
Sample lead time	7–10 working days
Production lead time	25–35 days ex-works from approval
Sea freight, indicative	25–35 days to EU ports 18–28 days to AU / NZ ports
Incoterms	EXW, FOB or CIF by agreement

Lead times are indicative and confirmed per programme at order. Bulk and repeat orders are scheduled ahead of first-run programmes.

BRAND SUPPORT INCLUDED

- **Label artwork & regulatory copy** drafted to your destination market
- **Dossier support** for EU notification, TGA listing and NZ importer files
- **E-commerce-ready packaging** — Amazon and Shopify transit specifications
- **Export documentation** and freight coordination end to end
- **Reformulation on request** — vegan alternatives, market-adapted dosing, clean-label swaps

Start with one SKU. Prove it. Then scale.

A 1,000-unit first run costs less than most brands spend on a launch photoshoot — and tells you more. Send your brief to sales@givaagro.com and we will come back with formulation options, compliance notes, indicative pricing and a realistic date.

SALES@GIVAAGRO.COM

LET'S BUILD YOUR BRAND

Send us a brief. We'll send back **what's actually possible.**

Tell us the market, the category and the price point. You will get a straight answer on formulation, compliance, cost and lead time — and if a product will not work in your market, you will hear that first, not last.
